**Greene's Inc. Throws Down the Best Concrete in Utah**

*Concrete-cutting company honored by the ACPA for Best County Road Concrete Pavement Project*

**WOODS CROSS, Utah** – January 20, 2010 – Greene's Inc. was honored today by the Utah Chapter of the American Concrete Pavement Association (ACPA) for the "Best Portland Cement Concrete Pavement County Road Project" completed in Utah during 2009. The project, Lost Creek Road Reconstruction, was completed for Morgan County between April and July of 2009. Greene's performed work including concrete paving, asphalt paving and landscaping on the roadway located in Weber Canyon near Croydon, Utah.

"This award is special to us because we focus most of our work on concrete cutting," said Kristin Waters, Greene's Inc. president. "We couldn't be more proud. Whether our projects are large or small, we try to do our best work, and we appreciate the ACPA's praise."

"We conduct the awards program to encourage high-quality workmanship in concrete pavement and recognize highly successful projects in Utah," says Mitzi McIntyre, Utah chapter ACPA executive director. "The concrete pavement that Greene's, Inc. constructed on Lost Creek Road will serve Morgan County for many years to come, with little maintenance required."

**About Greene's Inc.**

Founded in 1990, Greene's Inc. is the premier specialty contractor for concrete construction and demolition services and radon detection and mitigation in the intermountain region. Greene's was recently named one of the top specialty contractors in the region by *Intermountain Contractor* magazine. In 2009, Greene's Inc. president and general manager was honored as one of *Utah Business Magazine's* 30 Women to Watch. An environmentally-conscious business, Greene's continually looks for environmentally-friendly solutions to every project. For more information visit [www.greenesinc.com](http://www.greenesinc.com).

**About the ACPA**

The Utah Chapter, ACPA is a non-profit organization representing the concrete paving industry in Utah. Its membership includes contractors, materials suppliers, equipment manufacturers, and other firms providing essential services to the concrete paving industry. The purpose of the Utah Chapter, ACPA is to improve and extend the use of Portland cement concrete in the construction of pavements and to assist the cement and concrete paving industries in technical, educational, and promotional aspects, ensuring continued successful use of the material with economy to serve the needs throughout Utah for pavement construction.
